## Ozone FIP Compliance Certification Classification

Submittal Status (check appropriate description)

☐ Acceptable

☐ Needs Additional Clarification • Mobile paints were tested as per current ASTM guidelines, but

☒ Unacceptable *it appears that Not all coatings were tested using Method 24  
• Coatings are not certified "as applied"*

☐ Compliance

☐ Used correct capture/emissions control test methods

• Tests are less than one year old \_\_\_\_\_

• Tests are over one year old \_\_\_\_\_

☐ Used liquid-gas material balance method

☐ Used other method

• Included technical support to establish method equivalence to the methods specified in the FIP \_\_\_\_\_

☒ Compliance Coatings

☒ Provided Method 24/24A VOM analyses results of coatings <sup>some</sup> ~~"as applied"~~

☐ Provided alternative VOM analyses results and sufficient technical support to establish method's equivalency to Method 24/24A.

☐ Provided non-Method 24 analysis results without equivalency support

• Good faith effort \_\_\_\_\_

• Minimal effort \_\_\_\_\_

☐

Exempt Sources

☐

Non CTG Source

☐

Source below 100 tpy of potential VOM emissions

☐

Consent Decree

☐

Other
